Exercise Recommendation

Exercises allow users to practice their skills at assessing one to three scenarios they may encounter in the field. Users answer two to three questions for each scenario and are given a score and recommended remediation upon completion. Each scenario can be in a different format of a text document (e.g., sample communication plans, press releases, interview questions) or image (e.g., sample social media posts, military portraits, documentation photos, mission photos).

When a user selects an answer choice, feedback will display depending on whether it is correct or incorrect. Users must answer questions correctly before moving on. View examples on PAVILION for an exercise with one scenario using a text document and an exercise with three scenarios using images.

Fill out this form and email to pavilion@dinfos.edu. If you have any additional source materials (e.g., Word doc, jpg) that should be used or referenced, include them as an attachment to the email. Thank you for sharing your idea or resource!

To maintain the highest levels of integrity, resources are vetted and undergo an extensive review process. If approved, the information will be transformed and adapted to best suit the fleet and field. We will reach out to you with any questions.
